Projects

Gutenberg Reader - https://reader-brown.vercel.app/
- Built with Next.js, React, TypeScript, Node.js, and MongoDB.
- An ePub reader built for the Project Gutenberg free library of eBooks - allows users to read, annotate, highlight, and search hundreds of classic literature texts.
- Users can create an account to save, edit, and view their annotations from any device. Users can also save annotations locally.

Reddit Clone - https://reddit-clone-seven-pi.vercel.app/
- Built with Next.js, React, and TypeScript.
- A fully functional Reddit clone - features content sort, subreddit/user pages, dynamic search, and comment threads.

Portfolio Site - https://portfolio-jon-sternburg.vercel.app/
- Built with Next.js, React, and TypeScript.
- A static site built with Next.js.

Experience

Comcast
Technical Writer/End User Content Writer, February 2017 - October 2022
- Worked with developers to write API and technical product documentation.
- Built documentation site and Pandoc file converter for End User Content team.
